II. Title of the Practice: Save Mother Earth

Objectives: We have come to the age where we don't know life without innovation. We were born in it, got used to it, and gradually, our advancement is the main reason why our home is slowly dying. People have discovered all the things possible, from machines to construction to food to clothing to almost everything. We have used all the materials we can think of, and we have exhausted Mother Nature.

As of now, some people do not see the harm we do to our planet, but life is changing bit by bit. There is global warming because of the chemicals intoxicating the Earth. Fortunately, there are still people who care enough to fix things and make them better. That's why our institution is trying to promote eco-friendly activities and contribute to saving our one world.

The Context:

Saving our earth and its environment becomes highly important as it provides us food and water to sustain life. Our well-being solely depends on this planet. It gives food and water to all living things so it is our responsibility to take care of it.

The only way to honor our mother earth is by raising awareness about our environment and mother earth. By creating balance in our lives and adopting eco-friendly habits, we can make this planet a much better place to live in.

People around the world should understand the need for a greener & cleaner planet. We all need to fulfill our responsibilities & make ample efforts to protect our mother earth from planet harming activities.

The Practice:

To "Save Mother earth" Pune Vidyarthi Griha's College of Science and Technology organized the various activities as under:

· Tree Plantation:

Tree planting is recognised as one of the most engaging, environmentally friendly activities that people can take part in to better the planet. Trees greatly benefit the people living around them by having a positive impact on mental health and wellbeing, reducing stress and encouraging outdoor exercise. This is in addition to the benefits they will receive from an improved environmental quality and improved amenity which comes with planted areas,

Achik

Pune Vidyarthi Griha's
College of Science & Technology

so our institution took the decision to conduct Tree plantation activity every year.

· **Cleanliness activity:**

Clean India and Green India are the two sides of one coin. Mahatma Gandhi rightly said, "Sanitation is more important than independence", that's why our NSS Unit conducting the Cleanliness activity under Swachh Bharat Abhiyaan in our College campus and in adopted village every year in which our Principal, teaching and non-teaching staff also participates in cleanliness activity.

· **Save Electricity Campaign:**

Going green is the coolest lifestyle statement. It is not only in line with the latest environmental concerns but also incorporates age old practices, choices and habits. Institute is creating awareness among the students and society as whole to save electricity in the following manner.

- 1) Stop wastage by switching off unnecessary use. Fans, ACs, light bulbs when you are not around in the room. In case of ACs it has been seen that running them at 25 degree centigrade makes it most energy efficient.
- 2) Once this change is settled it is time to get more ambitious. Shift to energy efficient lighting and appliances. CFL are passé, now move on to LED. It consumes only one tenth of the electricity consumed by your 60 watt bulb.

Our Student Council organized the Poster making competition with the theme Save Electricity to generate the importance of Electricity among the students.

· **Protecting Our Planet Starts with You Campaign**

- **Conserve water.** The less water you use, the less runoff and wastewater that eventually end up in the ocean.
- **Reduce, reuse, and recycle.** Cut down on what you throw away. Follow the three "R's" to conserve natural resources and landfill space
- **Volunteer.** Volunteer for cleanups in your community
- **Conserve water.** The less water you use, the less runoff and wastewater that eventually end up in the ocean.
- **Shop wisely.** Buy less plastic and bring a reusable shopping bag.
- **Plant a tree.** Trees provide food and oxygen. They help save energy, clean the air, and help combat climate change.
- **Bike more.** Drive less.
- **Use long-lasting light bulbs.** Energy efficient light bulbs reduce greenhouse gas

Pune Vidyarthi Griha's
College of Science & Technology

emissions. Also flip the light switch off when you leave the room!
• Our Students involved in the Protecting Our Planet Starts with You Campaign organizing various activities like poster making, Essay writing, reel making, elocution etc.

Evidence of Success:

The practice has shown wonderful results in which the students & staff were motivated & have not only planted the samplings in locality but also participated in programs relating to environment protection by the way of planting the sampling and creating awareness among the people in the society towards environment protection, save waters, electricity, save fuel etc. water pollution, air pollution, global warming, climate change which will have the adverse effect on human beings, animals & nations on this planet, if stops

Problem Encountered and Resources required:

It was difficult to convince all the students and the success depends mostly on how students take this issue seriously, however, we were able to overcome this problem wherein a good number of students and staff have participated in the programs organized connected to environment protection. The financial resources needed for this implication of this cause met by the management. Also it had to face the issues of making adjustments in the time table a couple of times to arrange the activities, however it was fruitful in achieving the success. Enabling the stockholders to understand and work in this direction to have a wonderful world in its natural way.

❖ BEACH CLEANUP:

On the Occasion of Rashtrapita Mahatma Gandhi Jayanti and International Day of Peace, NSS Unit organized " **Swachh Bharat Abhiyaan** " on October 02, 2021. Cleaning up the country cannot be the sole responsibility of cleaning worker.

Do citizens have no role in this? We have to change this mindset.

- Name of the activity: Beach Cleanup
- Date of activity: 2 nd October 2021
- Place of activity: Versova
- No of volunteers: 16

Description

- The NSS Unit conducted a Beach Cleaning Activity at Versova.
- The goal of beach cleanups is to raise awareness in the population about marine pollution and contribute with it the reduction of garbage and plastic in the ocean.
- At the end of the activity our NSS unit of volunteers handed the collected garbage to the B.M.C workers for further processing.
